DOOR STYLES

EVEREST STYLE

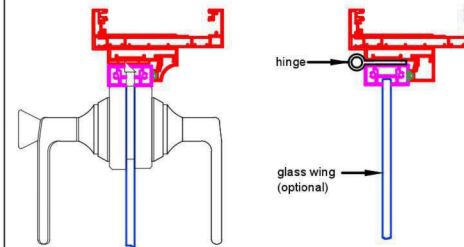

The panels of our Everest Style doors are made up of aluminium composite slabs and filled with pvc. It gives the perfect durability at outdoors and wet places. Being resistant to water, The Everest Style doors can be washed by it as wanted. According to the usage area, the bulletproof peculiarity can be obtained by the steel reinforcement. Beside this, circular and square glass applications are also possible by carving some certain places. Usage Areas: All the places need durability like houses, villas, hospitals, laboratories, toilets, schools and universities.

ATMOSPHERE STYLE

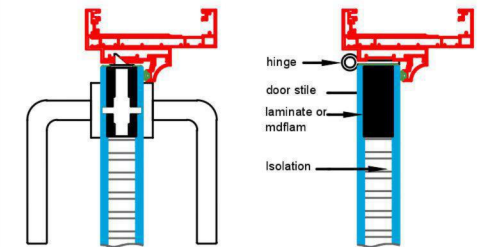

The panels of the Atmosphere - Style doors are completely made of transparent glass. The desired glass and door accessories can be easily applied. The panels can be modelled and be used with different colored glasses. As a standard, it is produced with the 10 - millimeter security glass. If desired, the glass in different width can be applied. Usage Areas: Offices, restaurants, toilets, schools, universities, hospitals, showrooms, etc.

OCEAN STYLE

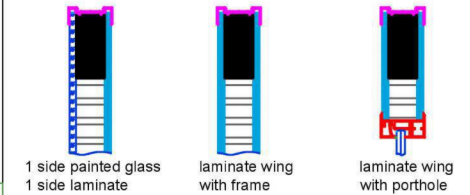

The panels of the Ocean - Style doors are 6 - 8 millimeter tempered glass. A narrow, decorative frame covers the sides. Panel can also be applied as half - wood and half - glass. The desired door and glass accessories can be easily applied. Usage Areas: Offices, restaurants, toilets, schools, and universities, hospitals, etc.

AMAZON STYLE

alternative ving types

The panels of The Amazon - Style doors are 40 - millimeter laminated wood or laminated MDF (Medium Density Fiberboard). It is very ideal for the interior usage. Usage Areas: Hospitals, offices, toilets, schools, universities, etc.
